HELLO, I'M RAMI CHELLALI.

I am a front-end web developer specialist with back-end experience. I have spent the last years working as a front-end developer.

My experience falls under three areas: front-end technologies (HTML5, CSS3, Responsive, SASS/SCSS, JavaScript),Content Management Systems development and theming (Joomla,Magento and Wordpress) and Project Management.
I also have a good understanding in working with back-end technologies using Java, NodeJs, PHP and MySQL. I can also effectively use Adobe suite of programs.

I recently became a Team leader Head of design department, which gave me the opportunity to coach lead and manage a team of designers and front end devs, and define the company's strategy.

I have also been developing my design skills as I have worked extensively with designers.

I am a proactive person who likes to take initiative and manage the project or tasks handed down to me.I am a smart and hard worker a problem solver and I don't back down from challenges.

I look forward to developing my career and skill-set further in every role. I take and I enjoy learning new things.

"A person who never made a mistake never tried anything new."
Albert Einstein
